

The consortium of Mainstream Technologies and KPCS CZ, they are IT partners for the GSA, the Galileo Agency

Subject to a four-year contract for the winning consortium is the complete support of the GSA agency in the field of system integration

Prague, 1st March 2018 - Mainstream Technologies, s.r.o. and KPCS CZ, s.r.o., providers of professional ICT solutions and holders of Microsoft Partner of the Year award, became partners for General IT support to European organization European GNSS Agency (GSA). The selection process, which lasted over four months, was won by a consortium led by company Mainstream Technologies, which builds on its previous almost three-year collaboration. Both members of the newly established consortium have previous experience with the GSA, supporting the Agency in Prague headquarters and its other affiliates throughout Europe.

Most technologies that IT infrastructure uses are based on Microsoft solutions. It will be taken care by a team of top experts from both companies, with the core of the team having experience from previous work for the European Global Navigation Satellite System Agency (GSA). Compared to the previous cooperation, which consisted in supporting technologies and internal processes, the current volume of activity is roughly three times wider.

„We are proud that we were able to succeed in the competition and that we can again work for the GSA, which for us is a major international reference. Obtaining a four-year contract means not only strengthening the stability of our company but also strategic victory in a single EU agency based in Prague,“ says Jan Lávička, Business Development Director in Mainstream Technologies, s. r. o.

„We greatly appreciate the fact that we can work for such a prestigious partner as the GSA. A contract of this magnitude is an honor for us and the trust in us from GSA is binding for us. We understand the victory in such an important tender as an appreciation of the quality of our top experts, and at the same time confirming our conviction that the merger of the two companies in this consortium proved to be correct. Therefore, we would like to continue with this cooperation and offer our joint services to other major customers,“ says Martin Pavlis, Business Development Director in KPCS CZ s. r. o.

About Mainstream Technologies, s. r. o.
